

Trade YOUR THIRSTY PLANTS for THRIFTY Plants!

In California, you can help stretch limited water supplies by planting beautiful varieties of drought tolerant plants. Thrifty plants need less water than thirsty plants. They are also easier to maintain so not only will they save you water, they will save you time. The California Water Awareness Campaign web site has links that list hundreds of native and drought tolerant plants that grow well in California. Go to www.wateraware.org to make the change from thirsty to thrifty! You'll be doing your part to meet the 20 percent water use reduction by 2020, and that's a "Nice Save!" For more easy tips on how to save water in California, visit www.wateraware.org
